Class Hours: According to the regulations of Minister of Education, R.O.C, 18 class hours could be counted as 1 academic credit in all universities in Taiwan. This course will have 72 class hours, including 40 lecture hours, professor 10 office hours, 10-hour TA discussion sessions, 2-hour review sessions, 10-hour extra classes.

Course Description:

This course traces the development of world civilizations from approximately 1500 to the present. It examines the creation of “modern” patterns of thought, culture, society, and politics. Its global approach offers the student an opportunity to learn about the diversity of human social life and understand the historical convergences, divergences, and interrelations among peoples. We are all products of this history, and, in this course, we will critically reflect on the meaning of our shared global heritage, both for us as individuals, as well as for the larger society and times in which we live.

In order to accomplish this, human actions must be situated, understood and analyzed in specific contexts. This lays the groundwork for an historical understanding of how the cultures and

civilizations were created and developed in response to specific environments and needs. Topics include:

- Cultures and civilizations
- Forms of political organization
- Forms of resistance and revolution
- Worldviews and religions
- Structures of economic organization
- The arts and sciences

While this course provides an overview of world history since 1500, the purpose of the course is not to teach you all you need to know about the subject. The primary objective of the course is to learn how to think critically about historical events and trends. With everything you study you will be encouraged to ask, “what was the significance of this in its historical context?,” and “what is its importance today?”

Required Texts:

- Kevin Reilly, Worlds of History: A Comparative Reader, Volume II, Bedford/St. Martin’s
- J.M. Blaut, The Colonizer’s Model of the World, Guilford
- Chinua Achebe, Things Fall Apart

Texts must be brought to class on the day they will be discussed.

General Information:

Class meetings will be grounded in discussion of the assigned texts. Readings must be completed before the class meeting in which they will be discussed. This enables students to get the most out of the lectures and to participate effectively in discussion.

Discussion: You will not be expected to have fully developed points of view about the course materials. However, you are expected to participate. No one will be penalized for being wrong or imprecise, for expressing uncertainty or frustration, or for changing their mind. But it should be clear that you are trying, that you have done the readings and are working toward a mastery of the material.

Availability: I expect that all of you, either alone or in groups, will contact me. I am almost always available to discuss the course material.

Cell Phones: Cell phones must be turned off and put away during class meetings.

Evaluation Criteria:

The value of our meetings will hinge on your advance preparation and on your willingness to engage the issues actively in class. When you are doing the readings, keep in mind that you will be expected to participate in the debates outlined in the readings, reject some positions, embrace others, and defend the choices you make.

Grades will be based on the following:

- Paper: 30%
- Midterm: 30%
- Final exam: 30%
- Attendance and participation: 10%

Exams: The midterm and the final will both be in-class exams. The midterm will pose a series of short-answer questions based on the course materials and lectures. The final will do the same and will also ask you to choose one of two essay questions. You will be asked to write an essay on one of the broad themes discussed in the course.

Attendance and Participation: This grade will be measured based on attendance and preparedness (i.e. whether students are prepared to discuss the reading).
